

Important Information for our Customers:

Independent laboratory tests have confirmed again:

Our cellulose acetate tape for the tipping of shoelaces is phthalate free and fully comply with the REACH criterias.

So our customers can continue to be sure that their shoelaces don't contain substances which are hazardous to health.

The company INTERTEK Consumer Goods GmbH in Fuerth, Germany, has examined three samples of Acetate-Tape for us:

Sample 1: Artur Müller & Söhne

Sample 2: Made in China
Imported by polish and german companies

Sample 3: Made in Taiwan
Imported by italian companies

Particularly striking is the examination result for the following phthalates:

Phthalate in %

Prüfverfahren: 12.01.02.04 _Phthalate_07-13 (2018-05)

Substanzname	Abk.	CAS-Nr.	BG	Nr. 1	Nr. 2	Nr. 3
Diethylphthalat	DEP	84-66-2	0,02	0,027	26	27

The examined Chinese and Taiwanese Films contain 26% and 27% Diethyl phthalate.

In the **REACH** Regulation 1907/2006 Art. 33, phthalates are included in the candidate list of very dangerous substances for their reproductive toxicity and endocrine damage.

Our special offer:

If you do not yet process our film, we offer to analyze your current film. The cost of 100,00 € will be refunded the next time you buy our film.
